

Database Class – First Homework

Deadline: 2022-03-04 23:59

In this assignment, you should **create a simple GitHub repository**. Additionally, you must push a simple project. On the other hand, if you do not have any project to do this assignment, you can create a simple project with the below structure:

Important Note: Your commit messages should be readable.

```
Main.py
Helper.py
Urls.txt
Tests/
    simpleTest.py
    Query.txt
```

Additional info: in all of the above files you can write a simple code or you can put this code `'print ("{your name}")'` in them (You should replace your name with '{your name}').

Important Note: You have to send **just** the **GitHub repository link** to my email **before the deadline**.

Email address for sending assignment: **omid.orh@gmail.com**

If you have any problem in the creation of the GitHub project, installation of git and GitHub desktop, pushing your project to GitHub, etc., you can contact me **anytime** using the email that has been mentioned.
